PROFESSIONAL SUMMARY

CompTIA Security+ certified cybersecurity professional with an M.S. in Leadership in Homeland Security & Emergency Management and hands-on cybersecurity training in governance, risk, compliance, security controls, vulnerability management, audit readiness, and remediation tracking. Experienced applying NIST CSF, NIST RMF, and NIST SP 800-53 concepts to security assessments and documentation. Developed SSP documentation, mapped security controls, tracked POA&M findings, collected audit evidence, assessed vulnerabilities, and developed risk-based remediation recommendations through cybersecurity training and projects. Seeking a GRC Analyst, Cybersecurity Risk Analyst, or Security Compliance Analyst position.

CERTIFICATIONS

CompTIA Security+ (SY0-701) | Mar 2026

Cybersecurity Professional Certificate — TripleTen | Mar 2026

Google Cybersecurity Certificate | Oct 2023

FEMA Emergency Management Certifications | Dec 2023

Transportation Safety Certificate — U.S. Department of Transportation | Mar 2020

CISSP — In Preparation

CORE GRC SKILLS

GRC & Risk: Risk Assessment · Risk Analysis · Security Controls · Control Mapping · Compliance Documentation · Audit Readiness · Remediation Tracking · Continuous Monitoring · Compliance Reporting

Frameworks: NIST CSF · NIST RMF · NIST SP 800-53 · SOC 2 · ISO 27001 · PCI DSS · MITRE ATT&CK

Documentation: System Security Plans (SSP) · POA&M · Security Control Documentation · Assessment Findings · Audit Evidence

Security Assessment: Vulnerability Assessment · CVSS · Security Findings · Remediation Recommendations · Threat Assessment

TECHNICAL SKILLS

Tools: Nessus · Nmap/Zenmap · Splunk · Wazuh · Microsoft Sentinel · Metasploit · WPScan · Wireshark

Systems & Networking: Windows Server · Windows · Linux · Ubuntu · Kali Linux (Lab) · TCP/IP · DNS · Firewalls · VPN

Security: SIEM Monitoring · Log Analysis · Incident Triage · MITRE ATT&CK · OSINT · Threat Intelligence

Scripting: PowerShell · Bash · Python (Basic)

Cloud: AWS IAM · AWS CloudTrail — Awareness

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Trainee

TripleTen Cybersecurity Professional Program / Supernova MGU Externship | Remote

Jul 2025 – Mar 2026

- Applied NIST CSF and RMF concepts to security assessments, vulnerability management, security monitoring, and remediation activities.

- Conducted vulnerability assessments using Nessus and Nmap, identifying security weaknesses and prioritizing findings through CVSS-based risk analysis.
- Developed risk-based remediation recommendations and tracked vulnerability findings through the remediation lifecycle.
- Contributed to System Security Plan (SSP) documentation aligned with NIST SP 800-53.
- Mapped security requirements to NIST SP 800-53 control families including Access Control (AC), Audit & Accountability (AU), Configuration Management (CM), and Incident Response (IR).
- Supported security control assessment and audit-readiness activities through structured evidence collection and documentation.
- Performed security monitoring and log analysis using Splunk, Wazuh, and Microsoft Sentinel to provide technical context for security findings.
- Conducted threat intelligence and OSINT research and mapped relevant findings to MITRE ATT&CK.

Transportation Operator

Transdev | BWI Airport | Laurel, MD
Feb 2020 – Present

- Conduct continuous security monitoring and surveillance within a regulated transportation environment.
- Identify operational risks, suspicious activity, and potential security threats and escalate according to established procedures.
- Investigate and document security incidents and communicate findings to appropriate security personnel.
- Maintain accurate security and incident documentation in accordance with established transportation security procedures.
- Support continuous situational awareness, risk identification, and incident-response activities in a high-traffic environment.

SELECTED GRC PROJECTS

NIST Compliance Documentation Project

- Developed SSP documentation aligned with NIST SP 800-53, identified compliance gaps, and documented remediation requirements.
- Supported audit readiness through security control documentation and evidence organization across 15+ controls.

POA&M & Remediation Tracking Project

- Managed vulnerability remediation tracking throughout the finding lifecycle.
- Prioritized findings using CVSS risk scoring and tracked 30+ POA&M items from identification through remediation status and closure.

SOC 2 Audit Readiness Project

- Performed security control mapping and evidence collection for a SOC 2 audit-readiness exercise.
- Organized compliance documentation and validated 20+ security controls for readiness review.

Enterprise Vulnerability Assessment

- Conducted Nessus and Nmap assessments across enterprise laboratory environments and developed risk-based remediation recommendations.
- Documented security findings to support remediation planning and security reporting.

EDUCATION

M.S. Leadership in Homeland Security & Emergency Management
Grand Canyon University | Jul 2024 | GPA: 3.68

Ph.D. in Psychology
California Pacificatory University | Nov 2025 | GPA: 4.0

B.A. Christian Studies
Grand Canyon University | Mar 2023 | GPA: 3.6
