

Daniel Urgessa

Cybersecurity Analyst (SOC / SIEM & Threat Detection)

CompTIA Security+ Certified | U.S. Citizen | Eligible for Secret Clearance

 danielurgessaofficial@gmail.com |  301-996-5783 |  LinkedIn: [linkedin.com/in/daniel-urgessa/](https://www.linkedin.com/in/daniel-urgessa/)

 Portfolio: github.com/Durgessa7/Danielurgessa-portfolio |  Laurel, MD

PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Analyst with hands-on experience in SOC monitoring, SIEM administration, threat detection, and vulnerability management. Skilled in Splunk, Wazuh, Microsoft Sentinel, Microsoft Defender, and MITRE ATT&CK-based threat analysis. Built and validated security detections through adversary simulations, log analysis, and vulnerability assessments in enterprise lab environments. Seeking a Tier 1 SOC Analyst position supporting incident detection, investigation, and response operations.

CORE SOC SKILLS

- SIEM: Wazuh, Splunk, Microsoft Sentinel
- EDR: Microsoft Defender for Endpoint
- Threat Detection & Incident Response
- MITRE ATT&CK Framework
- Log Analysis & Event Correlation
- Vulnerability Management (Nessus, CVSS)
- Network Monitoring (Wireshark, Nmap)
- PowerShell & Bash Scripting
- Windows/Linux Security Administration
- NIST CSF & RMF Fundamentals

TECHNICAL SKILLS

- SIEM: Wazuh, Splunk, Microsoft Sentinel
- Security Tools: Nessus, Metasploit, Wireshark, Nmap, Snort, Suricata
- Cloud: Microsoft Azure (Security Monitoring)
- OS: Windows Server, Linux (Ubuntu)
- Frameworks: MITRE ATT&CK, NIST CSF, CVSS

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Trainee (SOC Analyst) | TripleTen | Remote | Jul 2025 – Mar 2026

- Monitored security events across SIEM tools (Splunk, Wazuh, Microsoft Sentinel) to detect threats and anomalies.
- Reduced false positives by ~30% through alert tuning and rule optimization.
- Performed incident triage using MITRE ATT&CK framework for threat classification.
- Analyzed endpoint logs using Microsoft Defender and Windows Event Logs.
- Simulated credential dumping, scheduled task persistence, and LOLBin abuse techniques to validate SIEM detection coverage and improve alert accuracy.
- Resolved SIEM ingestion issues using least-privilege service account configurations.

Transportation Security Operator | Transdev BWI Airport | MD | Feb 2020 – Present

- Monitor surveillance systems and operational security alerts across transportation facilities serving thousands of daily passengers.

Daniel Urgessa

Cybersecurity Analyst (SOC / SIEM & Threat Detection) CompTIA Security+ Certified | U.S. Citizen | Eligible for Secret Clearance

 danielurgessaofficial@gmail.com |  301-996-5783 |  LinkedIn: [linkedin.com/in/daniel-urgessa/](https://www.linkedin.com/in/daniel-urgessa/)
 Portfolio: github.com/Durgessa7/Danielurgessa-portfolio |  Laurel, MD

- Investigate security incidents, document findings, and coordinate escalation procedures in accordance with established security protocols.
- Perform continuous situational awareness monitoring to identify suspicious activity, operational risks, and potential security threats.
- Maintain incident documentation and support reporting requirements in a regulated transportation security environment.
- Collaborate with security personnel and emergency response teams during operational disruptions and security-related events.

KEY PROJECTS (GITHUB PORTFOLIO)

SOC Monitoring & Threat Detection Lab

- Integrated Windows Defender Operational logs into Wazuh SIEM to improve visibility of endpoint-based attack activity.
- Developed detection use cases mapped to MITRE ATT&CK techniques T1218.010 (Regsvr32), T1003 (Credential Dumping), and T1053.005 (Scheduled Task Persistence).
- Troubleshoot log collection failures and implemented least-privilege service account configurations to restore data ingestion.
- Conducted PowerShell adversary simulations and validated successful alert generation for simulated attack activity.

Enterprise Vulnerability Assessment

GitHub Portfolio: github.com/Durgessa7/Danielurgessa-portfolio

- Conducted vulnerability scans using Nessus to identify enterprise security risks.
- Prioritized remediation using CVSS scoring and risk-based analysis.
- Converted scan data into actionable security remediation recommendations.

Education

Ph.D. in Psychology | California Pacific University | Jul 2025

M.S. Leadership in Homeland Security & Emergency Management | Grand Canyon University | Jul 2024 | GPA: 3.68

B.A. Christian Studies | Grand Canyon University | Mar 2023 | GPA: 3.6

Cyber Security Professional Certificate | TripleTen | Mar 2026

Certifications

CompTIA Security+ | Mar 2026

CISSP (In Progress)

CEH (in progress)

Google Career Certificate in Cybersecurity | Oct 2023

FEMA Emergency Management Certifications | Dec 2023

Transportation Safety Certificate | U.S. DOT | Mar 2020
