📁 Portfolio: github.com/Durgessa7/Danielurgessa-portfolio | 📍 Laurel, MD

PROFESSIONAL SUMMARY

CompTIA Security+ certified Vulnerability Assessment Analyst with an M.S. in Homeland Security & Emergency Management. Experienced in vulnerability assessment, penetration testing, security monitoring, and risk analysis. Skilled in identifying, validating, and prioritizing vulnerabilities using Nessus, Nmap, CVSS, and MITRE ATT&CK frameworks. Proven ability to deliver remediation-focused reports supporting enterprise risk reduction.

TECHNICAL SKILLS

- **Vulnerability Assessment:** Nessus, Nmap, CVE Analysis, CVSS Scoring, Vulnerability Scanning, Attack Surface Identification, Remediation Planning
- **Penetration Testing:** Metasploit, WPScan, Kali Linux, Penetration Testing Lifecycle, Exploitation Validation, Hack The Box Labs
- **SIEM & Threat Analysis:** Splunk, Wazuh, MITRE ATT&CK, Incident Detection & Response, OSINT, Threat Intelligence, OWASP Top 10
- **Systems & Network Security:** TCP/IP, DNS, HTTP/S, VPN, Firewalls, IDS/IPS, LAN/WAN, Packet Analysis, Windows Security, Linux Security
- **Scripting & Compliance:** Python, PowerShell, Bash, SQL, NIST CSF, RMF, DoD 8570 Awareness, Security Policies, Risk Management

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Trainee | TripleTen | Remote | Jul 2025 – Mar 2026

- Performed vulnerability assessments using Nessus and Nmap to identify security weaknesses and prioritize remediation activities using CVSS scoring.
- Monitored security events through Splunk and Wazuh SIEM platforms to identify suspicious activity and support threat investigations.
- Applied MITRE ATT&CK framework techniques to classify attacker behavior and support structured threat analysis.
- Conducted OSINT research on emerging cyber threats, threat actors, and attack methodologies.
- Developed incident response documentation aligned with NIST Cybersecurity Framework guidance.
- Analyzed vulnerability findings and translated technical results into remediation-focused recommendations.

Transportation Security Operator | Transdev BWI Airport | MD | Feb 2020 – Present

- Conduct security inspections to identify operational vulnerabilities and support risk mitigation efforts within transportation environments.
- Monitor surveillance systems and investigate security incidents to assess potential threats and recommend corrective actions.
- Support security risk assessments through observation, reporting, and analysis of operational weaknesses.
- Maintain compliance with transportation security procedures designed to reduce operational risk and improve safety.

KEY PROJECTS

Enterprise Vulnerability Assessment

- Conducted vulnerability assessments using Nessus, Nmap, and Wireshark to identify security weaknesses across enterprise lab environments.
- Evaluated vulnerabilities using CVSS scoring methodology and prioritized remediation based on risk and exploitability.
- Analyzed network services, open ports, and attack surfaces to identify potential security gaps.
- Developed remediation-focused recommendations supporting enterprise risk reduction.

SOC Monitoring & Threat Detection Lab

- Integrated Windows Defender Operational logs into Wazuh SIEM to improve endpoint visibility and threat detection.
- Developed detections mapped to MITRE ATT&CK techniques T1218.010 (Regsvr32), T1003 (Credential Dumping), and T1053.005 (Scheduled Task Persistence).
- Troubleshoot log collection failures and implemented least-privilege service account configurations to restore data ingestion.
- Conducted PowerShell-based adversary simulations to validate detection coverage and alert generation.
- Penetration Testing & Threat Intelligence
- Performed vulnerability validation and exploitation testing using Kali Linux, Metasploit, Nmap, and WPScan.
- Simulated real-world attack scenarios to evaluate security posture and identify exploitable weaknesses.
- Conducted OSINT-based threat research and mapped attacker tactics, techniques, and procedures (TTPs) to the MITRE ATT&CK framework.
- Produced structured technical reports supporting remediation and security decision-making.

EDUCATION

Ph.D. in Psychology | California Pacificatory University | Jul 2025

M.S. Homeland Security & Emergency Management | Grand Canyon University | Jul 2024 (GPA: 3.68)

B.A. Christian Studies | Grand Canyon University | Mar 2023 (GPA: 3.6)

Cybersecurity Professional Certificate | TripleTen | Mar 2026

CERTIFICATIONS

- CompTIA Security+ (SY0-701) | Mar 2026
- CISSP (In Progress)
- Google Cybersecurity Certificate | Oct 2023
- FEMA Emergency Management Certifications | Dec 2023
- Transportation Safety Certificate | U.S. DOT | Mar 2020
