💻 Portfolio: github.com/Durgessa7/Danielurgessa-portfolio | 📍 Laurel, MD

PROFESSIONAL SUMMARY

GRC-focused Cybersecurity professional with CompTIA Security+ certification and an M.S. in Homeland Security & Emergency Management. Experienced in risk assessment, audit readiness, compliance documentation, and security control mapping aligned with NIST CSF, RMF, and NIST SP 800-53 frameworks. Skilled in SSP development, POA&M tracking, vulnerability assessment, and translating technical findings into compliance reporting for enterprise environments.

CORE COMPETENCIES

GRC | NIST CSF | RMF | NIST 800-53 | ISO 27001 | Audit Readiness | Risk Assessment | POA&M Management | SSP Development | Continuous Monitoring | Security Control Mapping | Compliance Reporting | Evidence Collection

TECHNICAL SKILLS

- Tools: Splunk, Wazuh, Nessus, Nmap
- Frameworks: NIST CSF, RMF, NIST 800-53, ISO 27001, PCI DSS
- Risk Models: CVSS, MITRE ATT&CK
- Systems: Windows, Linux, TCP/IP, DNS, Firewalls, VPN
- Cloud: AWS IAM, CloudTrail (awareness)

PROFESSIONAL EXPERIENCE

- Cybersecurity Analyst Trainee | TripleTen | Remote | Jul 2025 – Mar 2026
- Supported security monitoring and incident documentation aligned with NIST CSF
- Performed vulnerability assessments and risk prioritization using CVSS
- Assisted with audit readiness via evidence collection and compliance documentation
- Contributed to System Security Plan (SSP) development and control mapping
- Supported POA&M tracking for vulnerabilities
- Applied MITRE ATT&CK for threat classification and reporting

Transportation Security Operator | Transdev | BWI Airport, MD | Feb 2020 – Present

- Conduct security inspections and identify operational risks in regulated environments.
- Monitor surveillance systems and report incidents per security procedures.
- Support risk assessment and mitigation through observation and reporting.
- Maintain compliance documentation and operational security records.

KEY PROJECTS

NIST Compliance Documentation Project

- Developed SSP documentation aligned with NIST SP 800-53 controls
- Identified compliance gaps and documented remediation recommendations

Daniel Urgessa
CompTIA Security+ Certified Cybersecurity Professional

✉ danielurgessaofficial@gmail.com | ☎ 301-996-5783 | 🔗 LinkedIn: [linkedin.com/in/daniel-urgessa/](https://www.linkedin.com/in/daniel-urgessa/)
💻 Portfolio: github.com/Durgessa7/Danielurgessa-portfolio | 📍 Laurel, MD

- Supported audit readiness through structured documentation

POA&M Management Project

- Maintained POA&M tracking for vulnerabilities
- Prioritized remediation based on risk severity and impact
- Supported compliance reporting and corrective actions
- SOC 2 Audit Readiness Project
- Assisted with evidence collection and control mapping
- Organized audit documentation for compliance readiness
- Supported validation of security controls

GITHUB PORTFOLIO PROJECTS

SOC Monitoring & Threat Detection Lab

- Integrated Windows Defender logs into Wazuh SIEM for visibility
- Mapped detections to MITRE ATT&CK techniques
- Implemented least-privilege controls for log integrity
- Enterprise Vulnerability Assessment Project
- Conducted Nessus vulnerability scans in enterprise lab environment
- Prioritized findings using CVSS methodology
- Documented remediation recommendations supporting risk reduction

EDUCATION

M.S. Homeland Security & Emergency Management | Grand Canyon University | 2024
Ph.D. Psychology | California Pacific University | 2025
B.A. Christian Studies | Grand Canyon University | 2023
Cybersecurity Professional Certificate | TripleTen | 2026

CERTIFICATIONS

CompTIA Security+ (SY0-701)
CISSP (In Progress)
Google Cybersecurity Certificate (2023)
FEMA Emergency Management Certifications (2023)
U.S. DOT Transportation Safety Certificate (2020)
